# EOS Saunatechnik

Since 1973, EOS has stood for high-quality sauna engineering developed and manufactured in Germany. Founded in 1944, the company designs and produces premium electric sauna heaters, modern sauna control units, infrared systems and steam room equipment, as well as a comprehensive range of accessories for private and commercial wellness facilities.

With 100% manufacturing in Germany and installations in more than 80 countries worldwide, EOS represents precision, performance and innovation in the international premium and luxury segment. Powerful engineering – including sauna heaters with outputs of up to 72 kW – meets sophisticated design and uncompromising quality.

# From the heat...

In the sauna, warmth settles around the body like a protective embrace. The air shimmers, time softens, and every breath feels like a quiet step back to oneself. The heat penetrates deeply, releasing tangled thoughts and opening a space for a calm that glows from within.

# ...into the cold.

The plunge into icy water is like awakening from a deep dream. The water envelops the body with crystal clarity – a moment of pure presence. The cold bites, yet it sharpens the senses: a surge of vitality that runs through the body, awakening the mind and expanding awareness.

# At the beginning: people.

The most rewarding profession in the world: wellness architects, planners and sauna builders connect people with the elements in an intense and meaningful way. Their ideas and designs stand for bathing culture – spaces and environments where people can recover and restore.

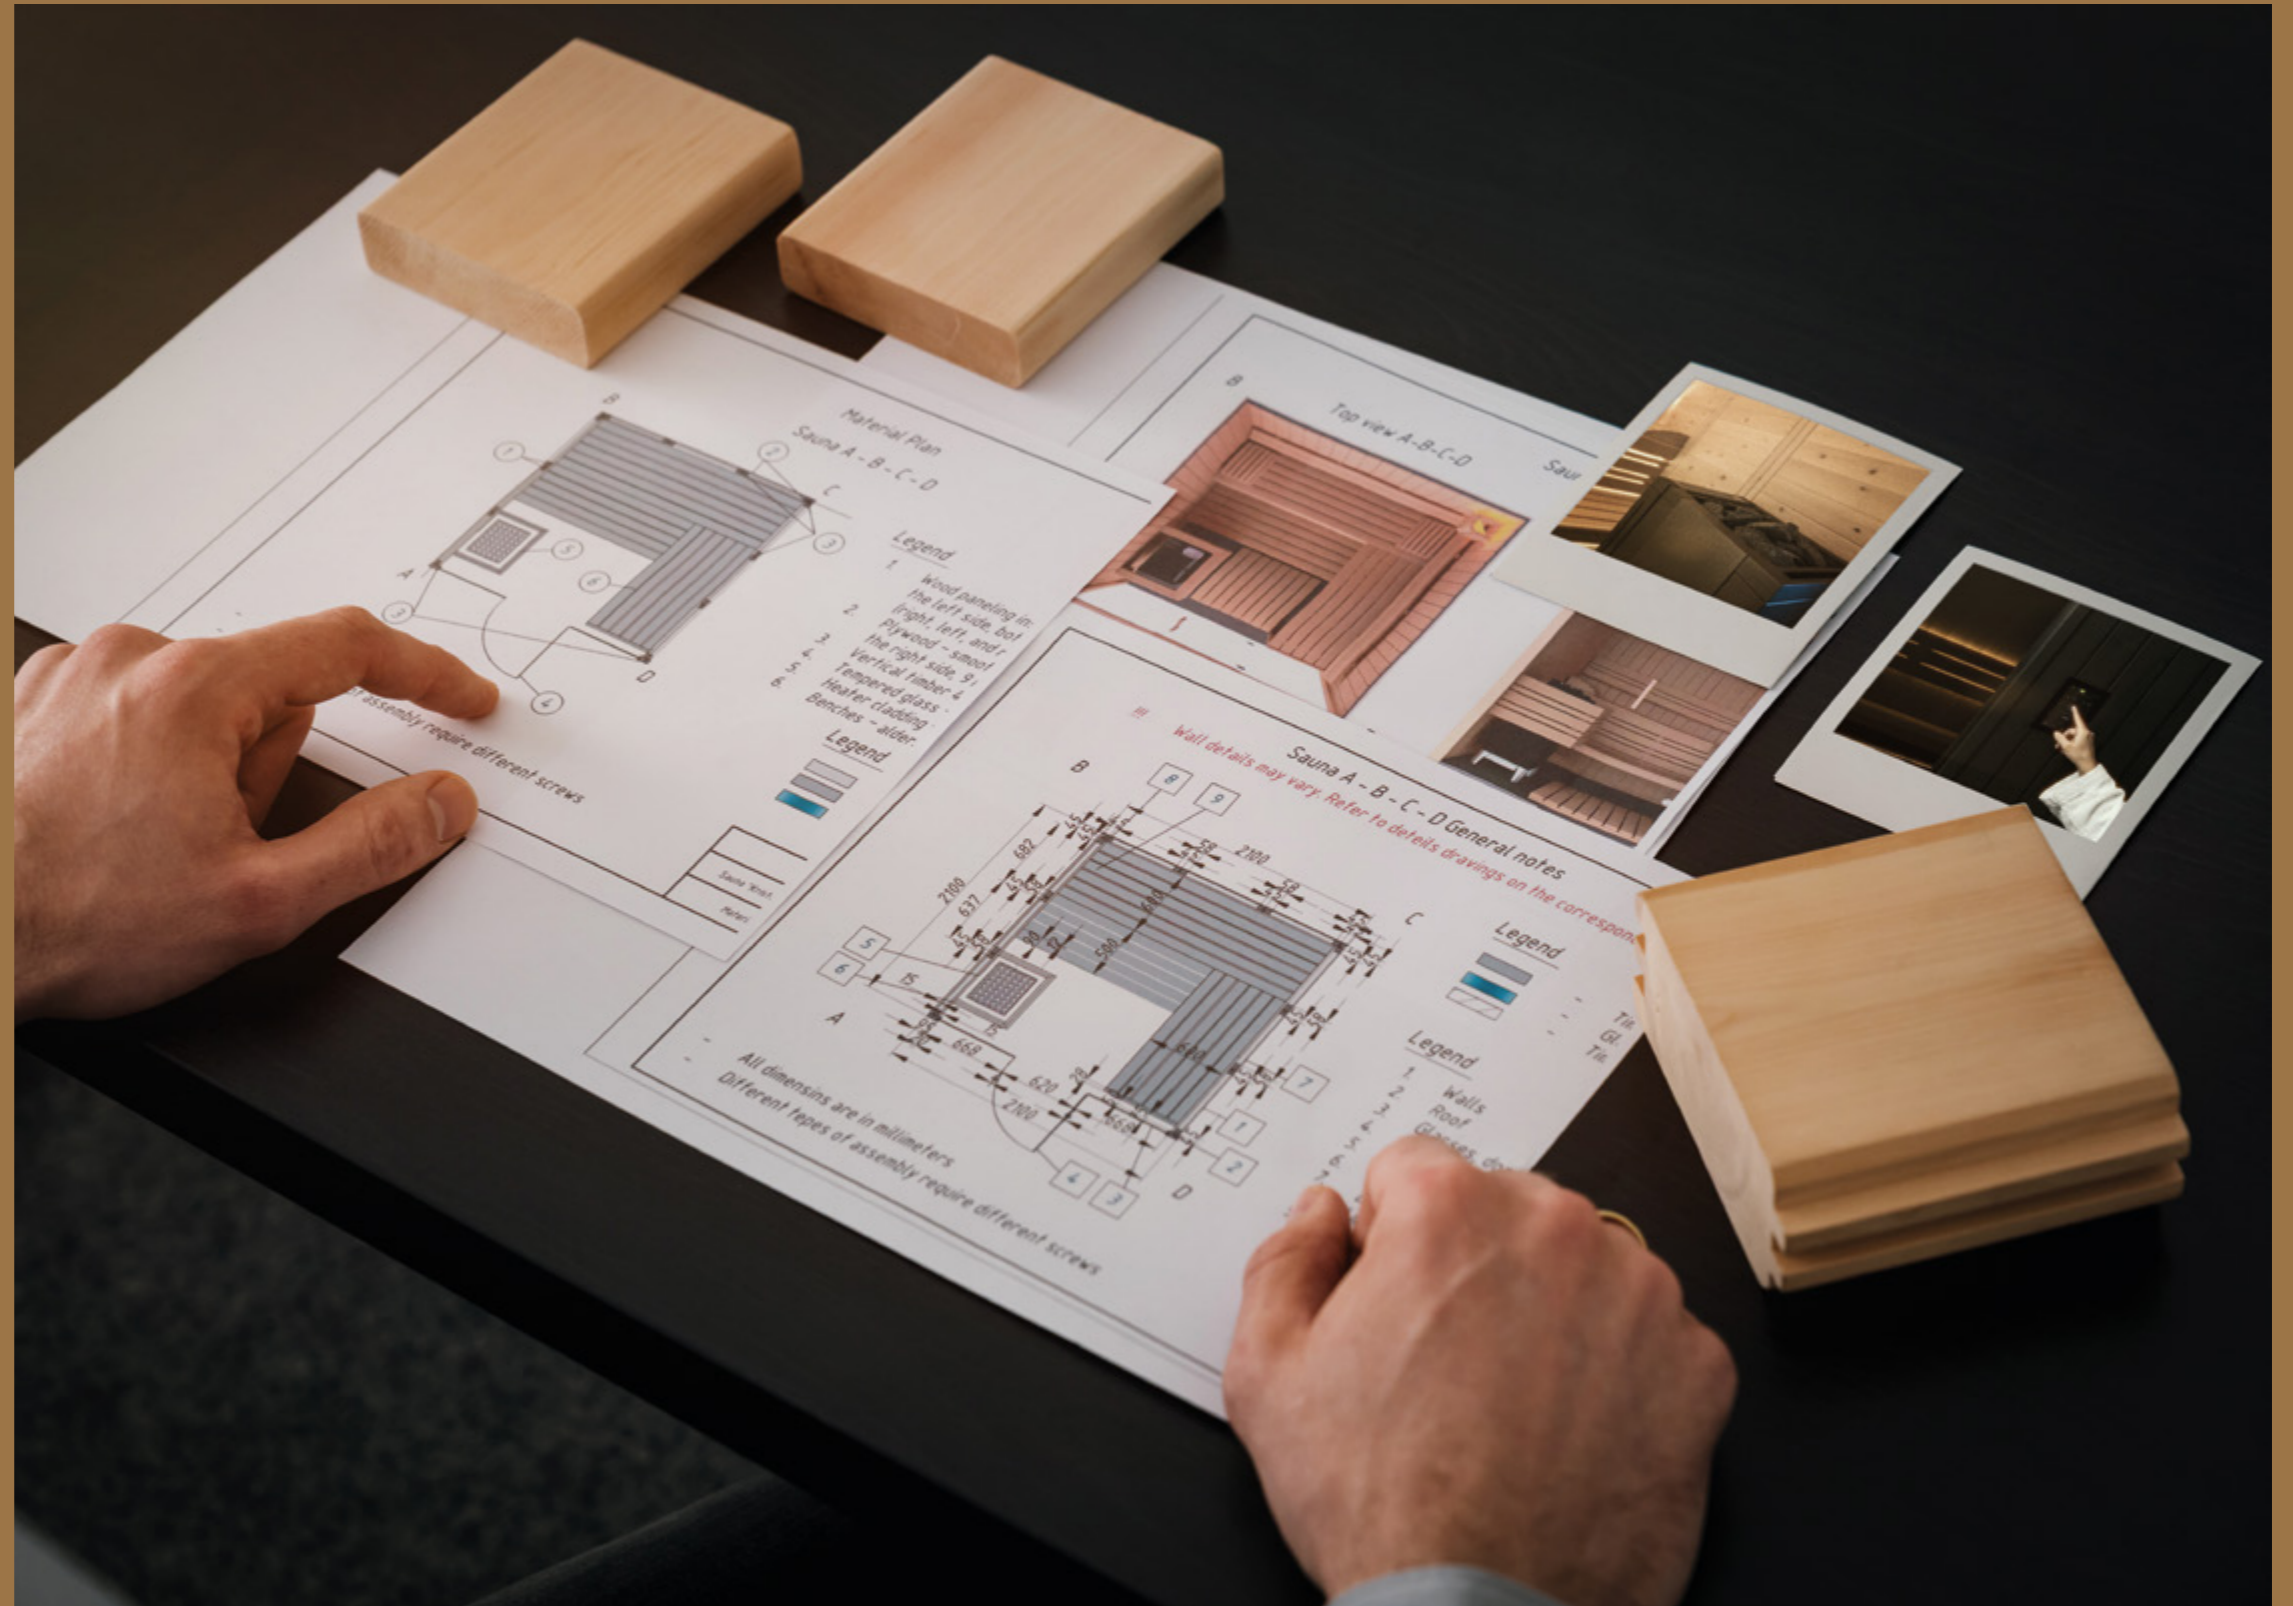

EOS works closely with some of the world's leading wellness specialists. Together we have been creating solutions for decades for people who seek to take care of themselves and enhance their well-being.

# Followed by the craft.

**Wellness architecture is created through masterful planning, skilled craftsmanship and the right systems and components.**

Whether private retreats or public wellness environments – bathing culture is always about sensitivity and bespoke solutions in the premium segment. It requires an investment of time and space – both of which are ultimately invaluable. A respectful approach to space, both indoors and outdoors, goes hand in hand with a conscious use of time – the time people spend to rest, recover and regenerate.

For EOS, this is a consistent path: the human desire for relaxation calls for professional partners who can bring this vision to life.

**EOS** provides the world's leading sauna and wellness planners with components as building blocks for bespoke wellness architecture. From sauna heaters and steam generators to infrared systems, cooling solutions, control systems, app and cloud-based technologies – all the way to lighting and sound installations.

# The art of shaping heat.

EOS follows a clear design philosophy: design can stage, organize – or deliberately step back. Sometimes it becomes the focal point of architecture, sometimes an expression of attitude, sometimes almost invisible. Three design concepts, three ways of shaping wellness architecture.

## Design concept 1: Staging.

Some spaces call for a strong centre – an object that draws attention and defines the atmosphere. The EOS Structure follows this principle: its sculptural form stages heat as a visible source of energy – an architectural statement within the space.

With its open structure, clean lines and precise craftsmanship, it combines materiality with presence. For spaces that aim to express character – bold, distinctive and exceptional.

## Design concept 2: The clear form.

Clarity, precision, logic – the EOS Mythos represents a purist design that adds nothing unnecessary. Its clean lines, smooth surfaces and precise craftsmanship consistently follow function. The result is an aesthetic that radiates calm and understands tangible warmth as an integral part of the architectural whole.

Its understated presence allows the space to unfold – reflecting a principle that has guided architecture since modernism: form follows function.

## Design concept 3: Heat is enough.

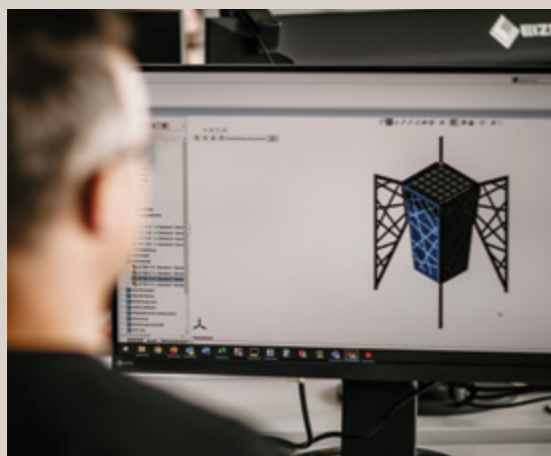

The essence of a sauna heater is heat – does it really need to be visible?

Under-bench and back-wall heaters from EOS **integrate seamlessly into the architecture**, offering maximum freedom in design and safety in use. They are the choice for purists – and create space for elemental experiences. Pure well-being, without a visible source. **Underbench and behind-the-bench heaters from EOS can be found in our catalogue: Professional Collection.**

# Crafted in our factory.

EOS does not simply build wellness generators and control units. EOS develops integrated systems in which heat, steam, infrared, light, sound, and cold merge into holistic experiences. All of this is created with maximum depth of manufacturing in our own manufactory – made in Westerdal, Germany.

Beauty and quality thrive where people take responsibility – for every detail, every line, every dimension. At the EOS manufactory, for example, each sauna heater is assembled by a single technician. This principle creates personal accountability and gives every product its own character.

Design at EOS emerges from the interplay of construction, design, engineering expertise and an understanding of form – all working together to unite function and aesthetics.

Interview with EOS designer Florian Seemüller – on form and attitude.

## What defines product design at EOS?

EOS thinks in context. A heater, a control unit or a lighting element is always part of a larger system. It is not about standing out, but about shaping objects that feel natural within a space – calm, precise and harmonious.

## How is architectural thinking translated into technical products?

Wellness architecture is about clarity, proportion, material and light. The same applies to technical elements. When every detail is consistent, the whole becomes coherent. For me, this means reducing complexity to what truly matters.

## What does quality mean from a design perspective?

Quality is closely linked to attitude. You can feel when every detail has been developed with care – from material to operation. EOS lives this principle: people take responsibility for their work. That is how something of real value is created.

Every EOS product reflects this approach: constructive clarity, defined edges and precise transitions express a design culture in which technology and aesthetics are understood as one. Stainless steel and finely refined surfaces are composed with precision.

The manufactory is more than a place of production – it is the home of the EOS system. A sauna heater never stands alone; it becomes part of an architectural whole in which function, proportion, light and material interact. From this system emerges a quiet sense of self-evidence – the kind that defines true quality: everything has its place, everything makes sense.

German manufactory expertise and craftsmanship merge into a distinct attitude – the conviction that perfection is not decoration, but an expression of respect for form.

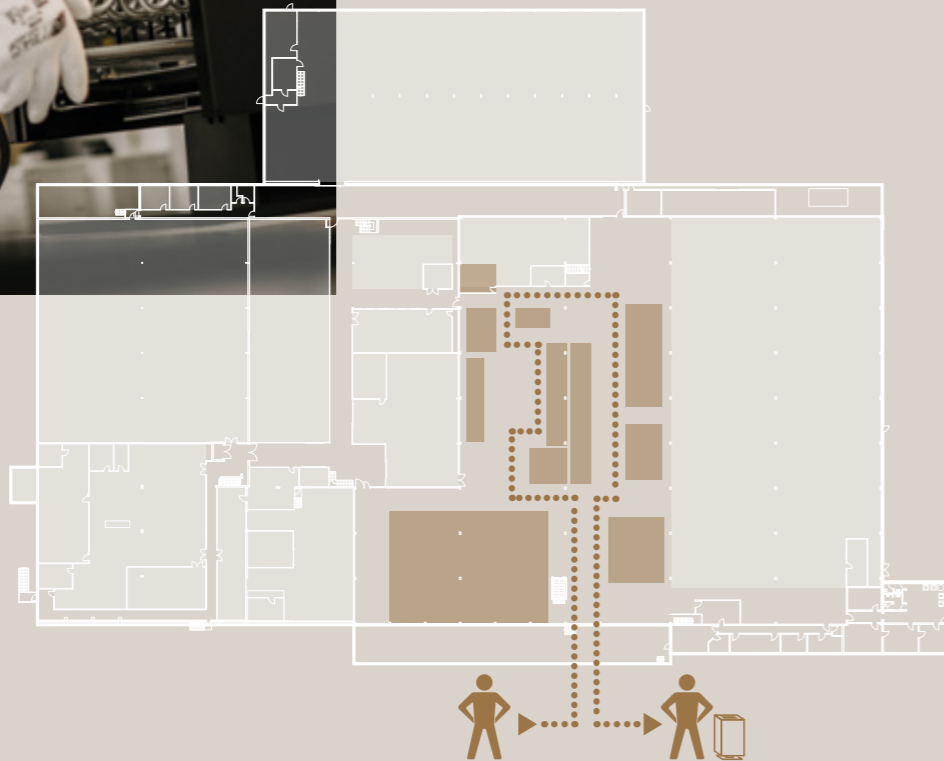

# Made in Westerwald.

Some say that at EOS we manufacture the world's finest wellness generators and control systems. That may well be because we build our products differently.

## Wellness comes from primeval forces – and from skilled hands

Every sauna heater is manufactured in our manufactory with the utmost care. Especially in final assembly, we follow the principle of "one technician, one heater": one person is fully responsible for this sensitive production step – from precise assembly through to final inspection. Each unit is fully traceable. This ensures that only products of verified quality and long-term reliability leave our manufactory.

## Wellness must be orchestrated

Wellness is a system in which heat, steam, infrared, light, sound and cooling must be precisely coordinated and controlled – to create the perfect relaxation experience. This cannot be left to chance, nor to off-the-shelf electronic components.

EOS understands this orchestra of systems – and knows how to conduct it. That is why we have developed a fully integrated orchestration concept: modular control hardware, operation via the sauna control unit, the EOS app and the EOS Cloud. And most importantly: we don't just develop – we manufacture. In Westerwald, Germany.

# Wellness worldwide – from the Westerwald.

As a hidden champion, EOS manufactures exclusively in the Westerwald – achieving exceptional quality and precision through maximum depth of production. For wellness, across the globe.

The EOS factory supplies sauna and wellness projects worldwide – from private two-person cabins in alpine retreats to expansive wellness landscapes with infusion ceremonies and sauna heaters up to 72 kW for large audiences.

Leading wellness architects and sauna builders rely on our technological solutions. Because they know they can depend on us. And because, together with our partners, we aim to deliver nothing but the best.

# The sauna, elevated.

The sauna is the central element of any wellness application. It becomes a space for targeted regeneration, mental relaxation and long-term well-being. With the right components, a versatile system is created to meet different needs – from intense sweating to gentle warmth and immediate perceptible deep heat.

## 1. Finnish – dry sauna with infusion, up to 110°C

This is what every EOS sauna heater delivers: the classic Finnish sauna as a combination of convective and radiant heat, enhanced by the experience of infusion. Regular sauna sessions stimulate circulation, support the cardiovascular system and help reduce stress.

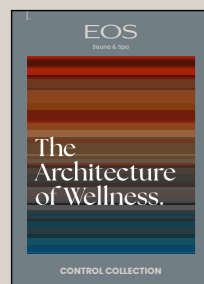

## 2. Combi – the option of a steam sauna up to 65°C

EOS Combi sauna heaters extend the classic sauna with a second mode: milder heat combined with increased humidity. This gentle climate relaxes the body, supports circulation and intensively hydrates the skin. It promotes blood flow, loosens the muscles and leaves the skin feeling noticeably soft and cared for.

## 3. Sauna without waiting time – with infrared deep heat

Infrared radiant heat penetrates deep into the body, stimulates circulation and relaxes the muscles. It supports regeneration and activates the metabolism. Immediately available, it is ideal for everyday use or after exercise. EOS infrared radiators are ready at the touch of a button and can be precisely controlled.

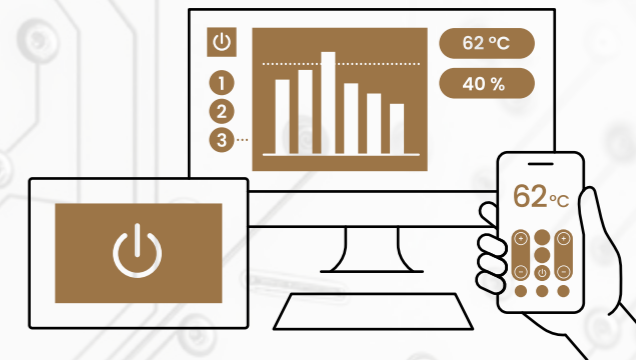

### Sauna orchestrated

Many EOS control units enable the interaction of different sauna modes and precisely regulate temperature, humidity and radiant heat. Details can be found in the catalogue: Control collection

# Wellness, like clockwork.

The technical architecture behind wellness and bathing culture – this is the EOS system world. The generators create elemental sensory experiences. The control systems transform them into individually tailored, intuitive wellness.

## The control systems: touch panels, app & more

For the precise effect of the generators and their perfect interaction, the control systems are essential. The EOS control concept is designed to be fully intuitive and comprehensive: from local control via the sauna control unit to the EOS app and the EOS Cloud.

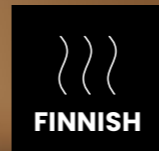

This creates a perfectly balanced overall experience. Temperature, humidity and intensity interact seamlessly and can be adjusted to the moment. From activating heat to gentle relaxation – individually tailored and reproducible at any time.

## The generators: heat, cold, steam & more

Elemental encounters: EOS products of the “generator” type – such as sauna heaters, infrared heaters and steam generators – create the fundamental stimuli of every wellness application. They generate heat, radiant warmth, steam or cold and have a direct effect on the body.

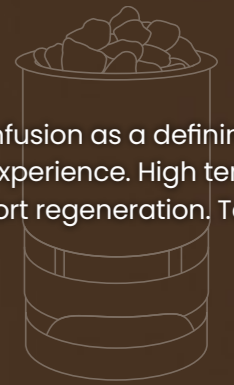

These products form the energetic core of the sauna and wellness experience. Heat stimulates circulation and relaxes the muscles, radiant heat works deep within the body, steam nourishes the skin and supports breathing, while cold activates and revitalises. This is how energy becomes a tangible benefit – for regeneration, well-being and renewed vitality.

100 °C  
dry heat

### Finnish sauna

The origin of the sauna. Dry heat – intense and pure, with infusion as a defining element. All EOS sauna heaters enable this classic sauna experience. High temperatures stimulate circulation, promote blood flow and support regeneration. Tension is released, the mind clears and the body finds rest.

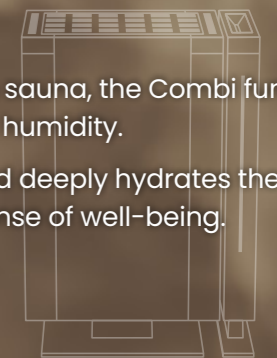

65 °C  
humid warmth

### Combi sauna

One sauna, two experiences: alongside the classic Finnish sauna, the Combi function offers a milder option with gentle heat and increased humidity.

This soft climate relaxes the body, supports circulation and deeply hydrates the skin. It promotes regeneration and creates a balanced sense of well-being.

Infrared  
radiant heat

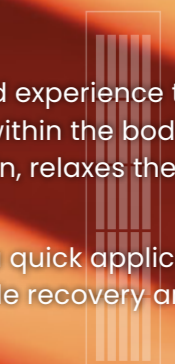

### Deep heat, instantly

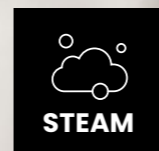

The combination of sauna and infrared creates a hybrid experience that unites different forms of heat. Infrared radiation acts directly within the body, without the need for preheating. The warmth unfolds deep within, relaxes the muscles and stimulates circulation.

Ideal for targeted regeneration, relieving tension or as a quick application in everyday life. Especially after exercise, it supports muscle recovery and helps restore performance.

Further information can be found in the catalogue: **Classic Collection.**

Steam  
humid

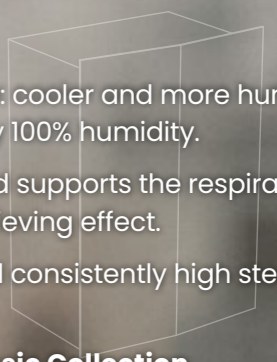

### Gentle warmth that lets you breathe

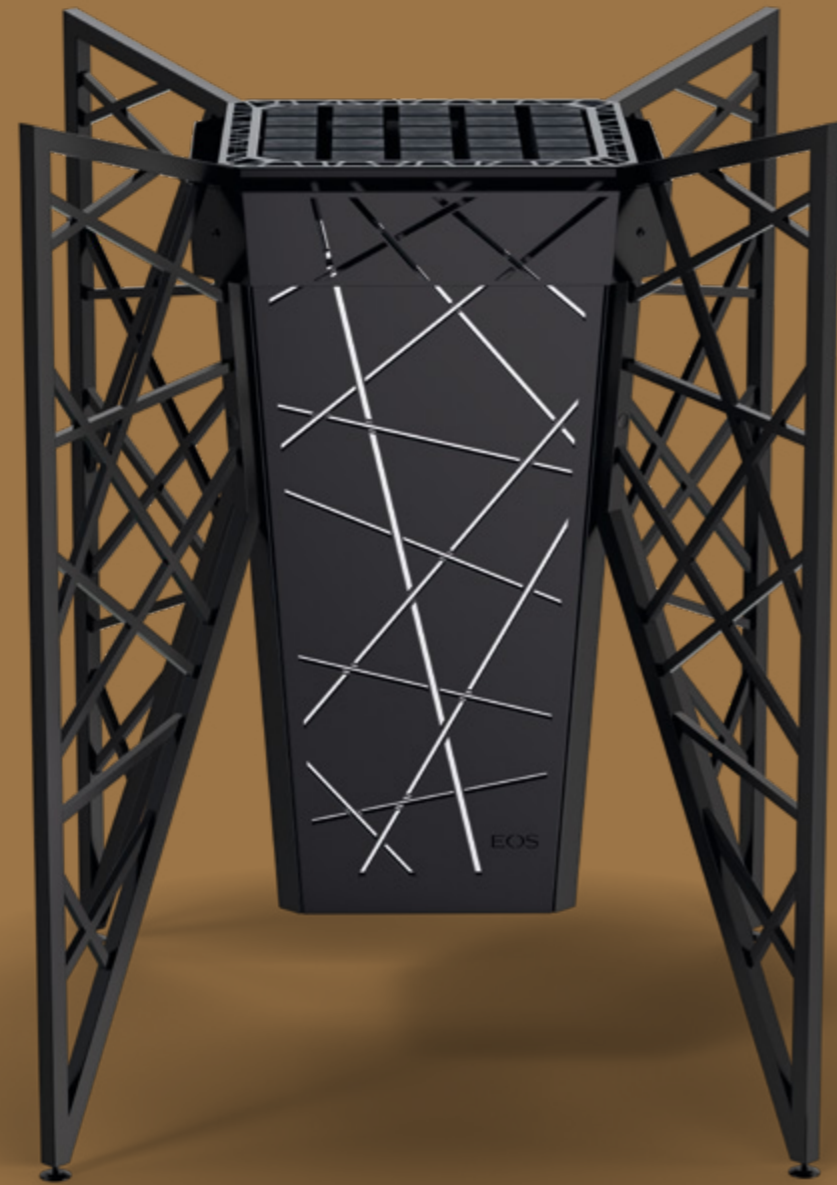

The steam bath introduces a completely different climate: cooler and more humid, with temperatures between approx. 40 to 50°C and nearly 100% humidity.

The moist warmth relaxes the body, nourishes the skin and supports the respiratory system. It is particularly gentle and creates a soothing, relieving effect.

EOS steam generators stand for reliable performance and consistently high steam quality – for a stable, uniform experience.

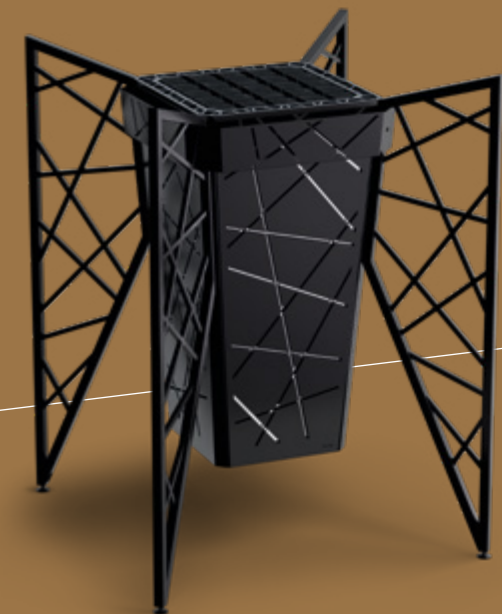

Further information can be found in the catalogue: **Classic Collection.**

# The sculpture.

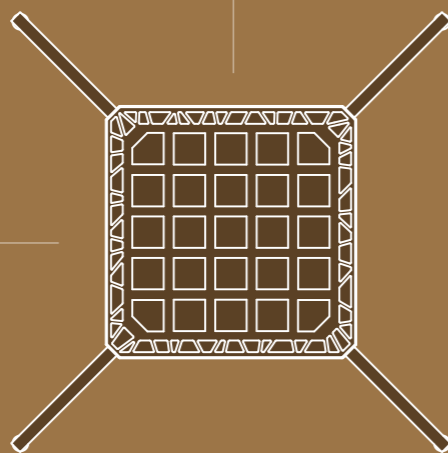

In front of this heater, the highlight of the sauna is celebrated – it becomes the sculptural centrepiece of any sauna setting. Its appearance is inspired by insect anatomy: the central body with heating elements and stones is framed by struts of triangular geometry. Laser-cut openings within the body ensure efficient convection and rapid heat-up. It is the ideal choice for large cabins – and, thanks to its glass surfaces, visually striking from every angle. Whether filled with Cubius stones or classically stacked.

EOS Structure

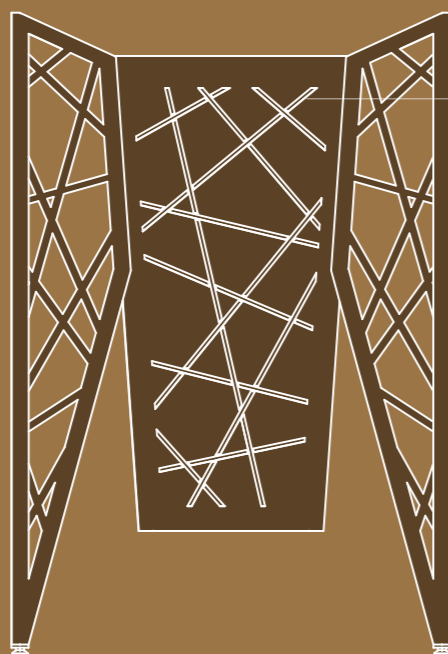

# EOS STRUCTURE

**Heat balance:**  
The three-layer construction integrated into the body, combined with the external stone volume, ensures an ideal balance between fast convection and pleasant radiant heat.

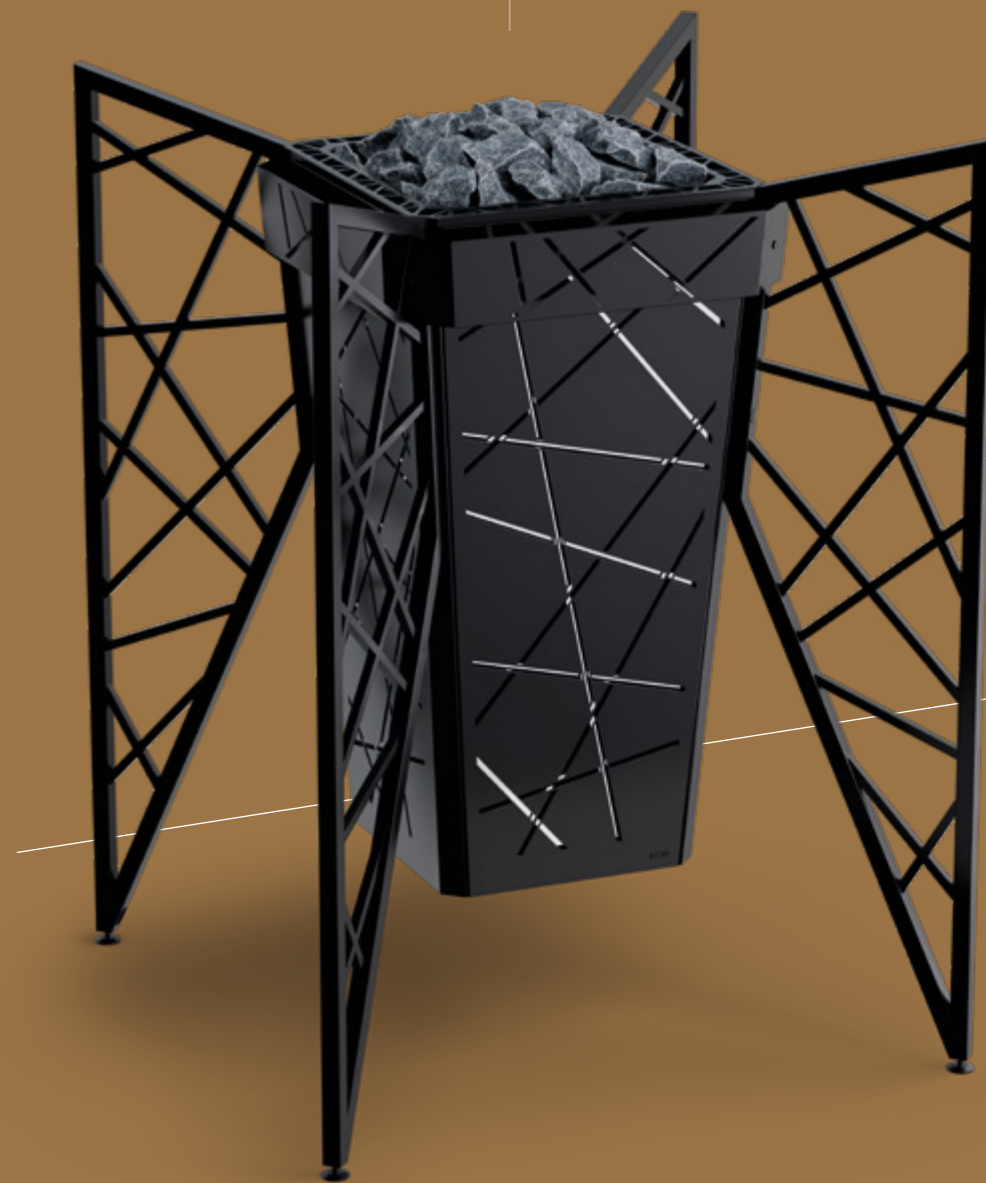

**Stones:**  
Incl. Cubius stones or classically stacked diabase stones. The heater delivers excellent sauna infusion performance.

**Elevated design:**  
Visually refined from every angle, with concealed cable routing. Structural struts ensure a stable and secure stand.

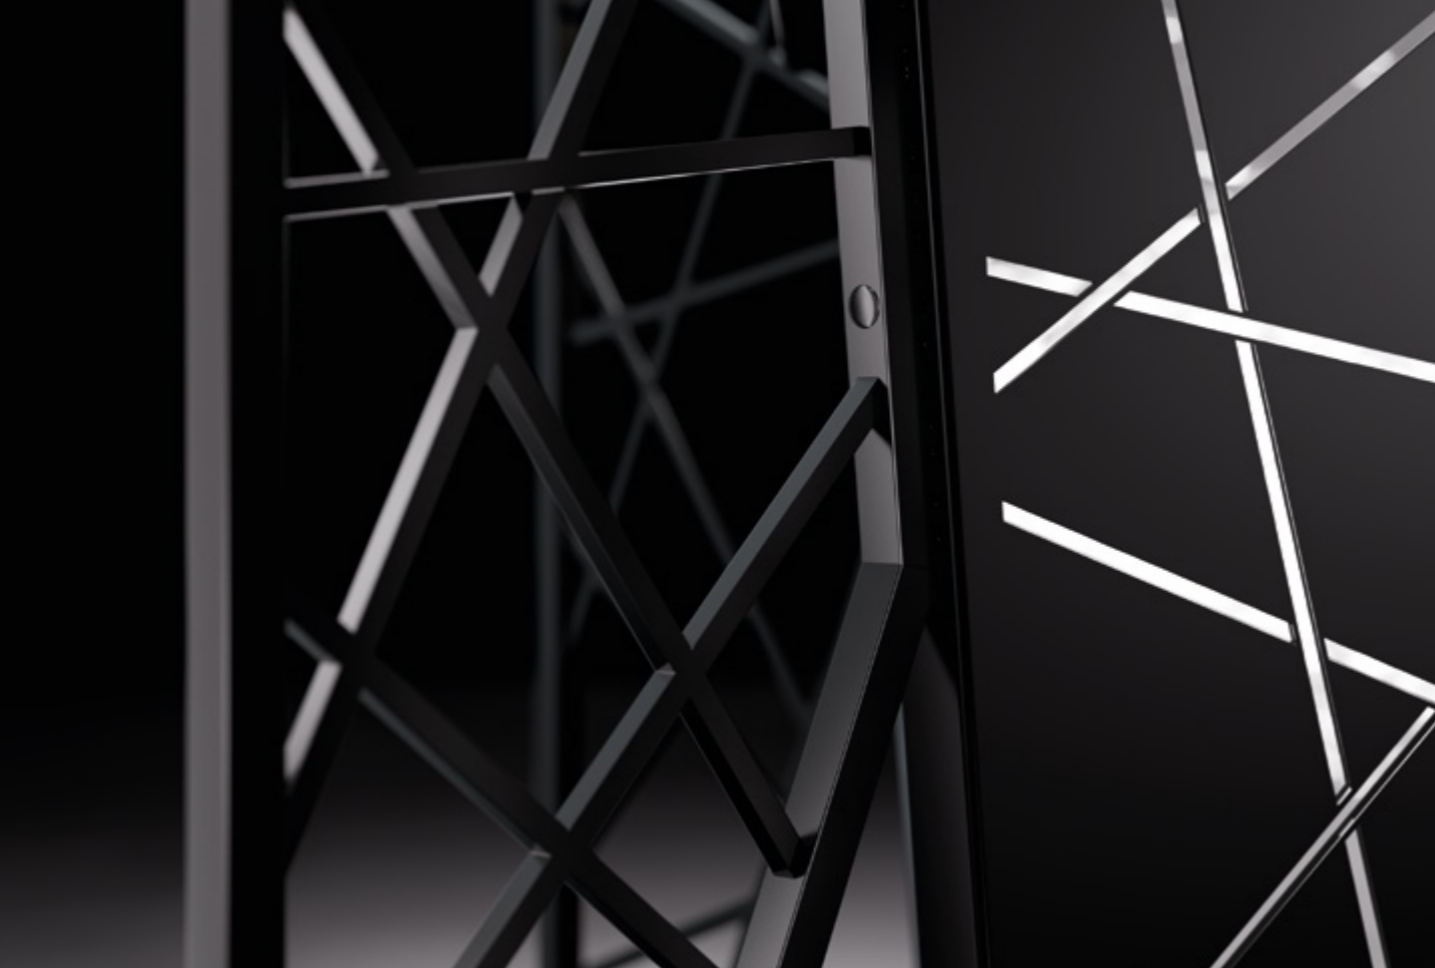

**Air channels:**  
Laser-cut air channels enable rapid heat transfer through heated air (convection).

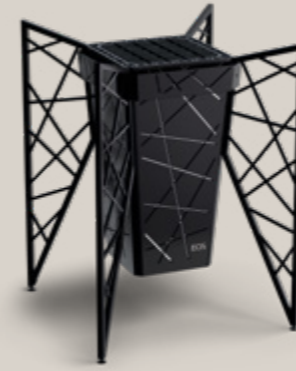

**Open construction:**  
The open structure allows efficient heat distribution and supports intensive infusions.

FINNISH 6-12kW 6-18m³ 30 kg

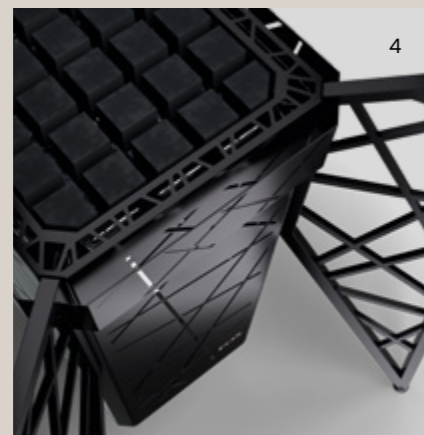

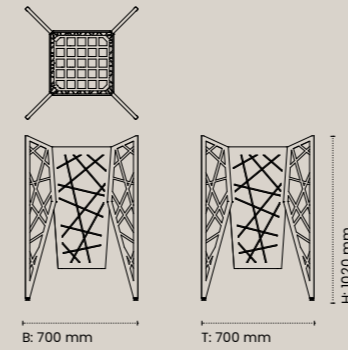

## EOS STRUCTURE

### EOS STRUCTURE Sauna heater

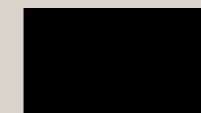

Stone volume: 30 kg  
 Output: 6 / 8 / 10 / 12 kW  
 Electrical connection: 400 V 3N~50/60 Hz  
 Installation: floor-standing

## ACCESSORIES AND OPTIONS

- 1 Sauna control unit U-Command:** Highly intuitive touch control in white or black. Can be mounted vertically or horizontally. Fully compatible with EOS Cloud and the EOS app (smartphone and tablet, iOS and Android). Further information in the catalogue: Control collection.
- Monitoring system **EOSafe L:** Works with a ceiling-mounted light barrier and a reflector mounted on the heater. Detects unintended objects in the hazard zone. Scope of delivery includes control unit, ceiling module and reflector in black.
- Optional: Available with complete stone filling using **Diabase sauna stones (3)**. Standard version supplied with **Cubius sauna stones (4)** in black. Special heights and formats such as Cubius Loop (not shown) are also available.

## SURFACES

EOS Future Silver Wave

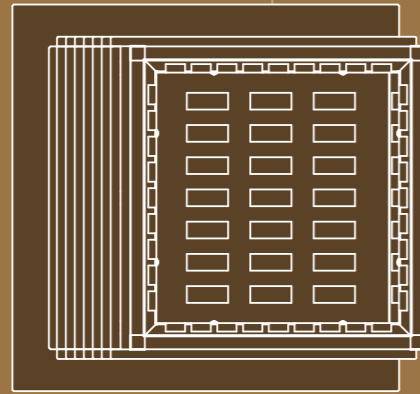

# The Visionary.

This distinctive design concept is based on a high level of individualisation. All variants impress with their refined detailing and a sculptural design language. The inclined cubic form alone creates a striking presence. Hand-applied polished stainless steel lamellas create sophisticated contrasts with the elegant black matt finish, emphasising the futuristic and refined character.

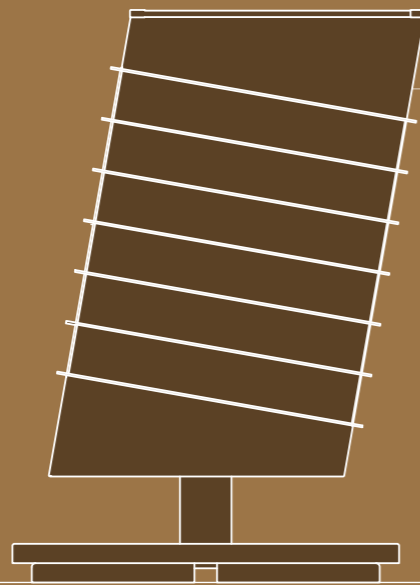

EOS Future Silver Wave

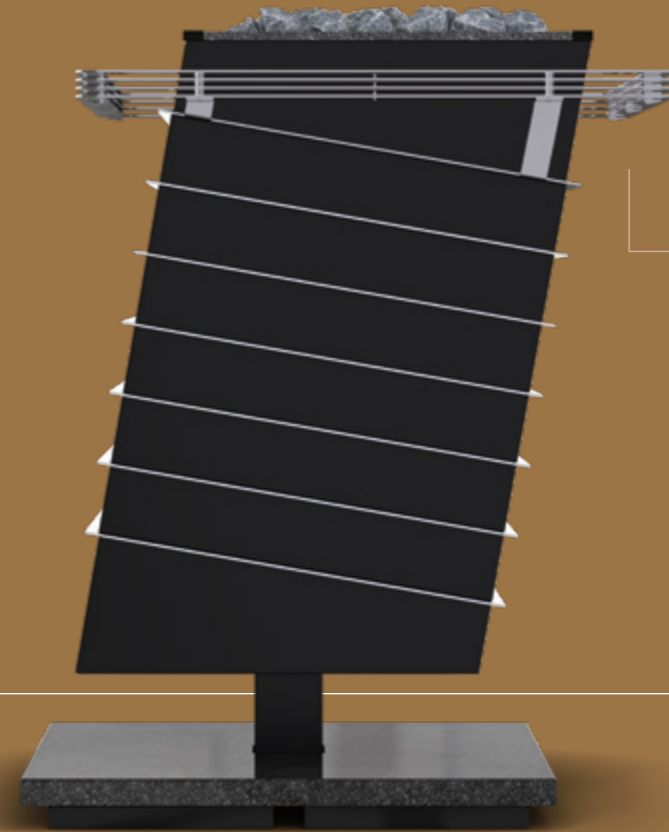

**Large stone chamber:**  
Optimised stone volume for intense infusions and a powerful sauna experience.

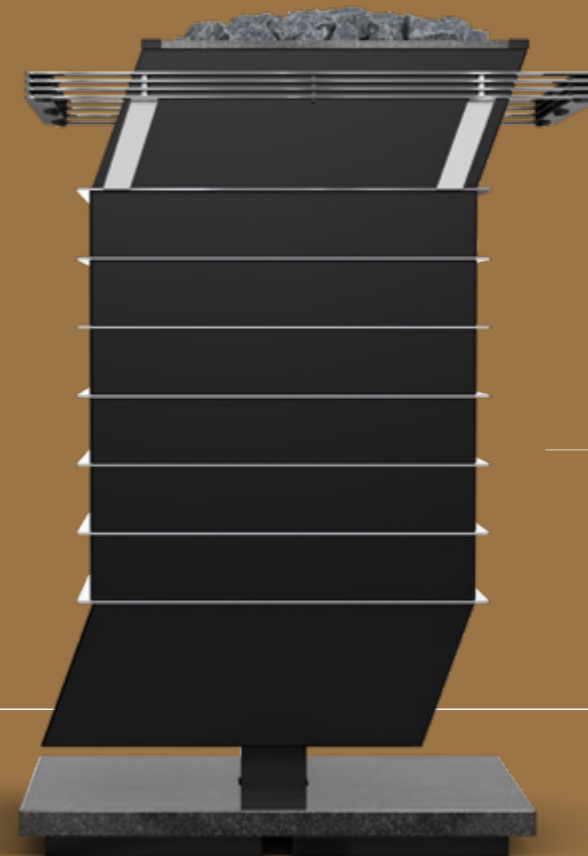

**Premium natural stone base:**  
Solid Nero Impala or Silver Wave base plate for stability and a refined appearance.

**Design lamellas:**  
Horizontal lamellas structure the surface and support even heat distribution.

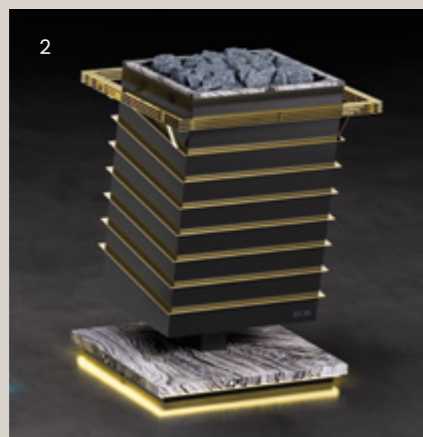

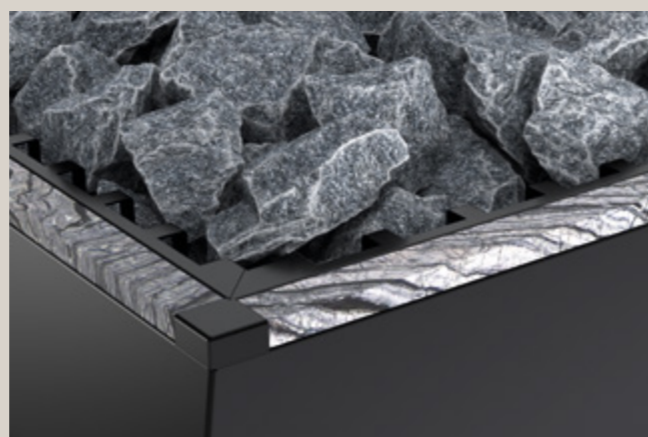

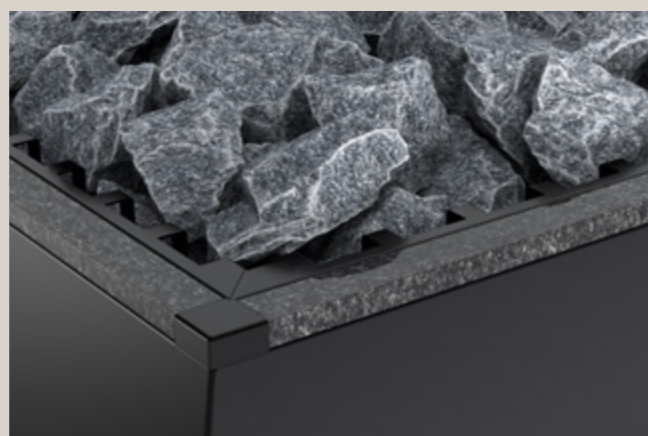

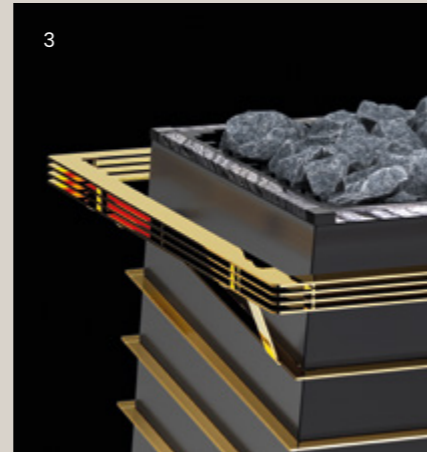

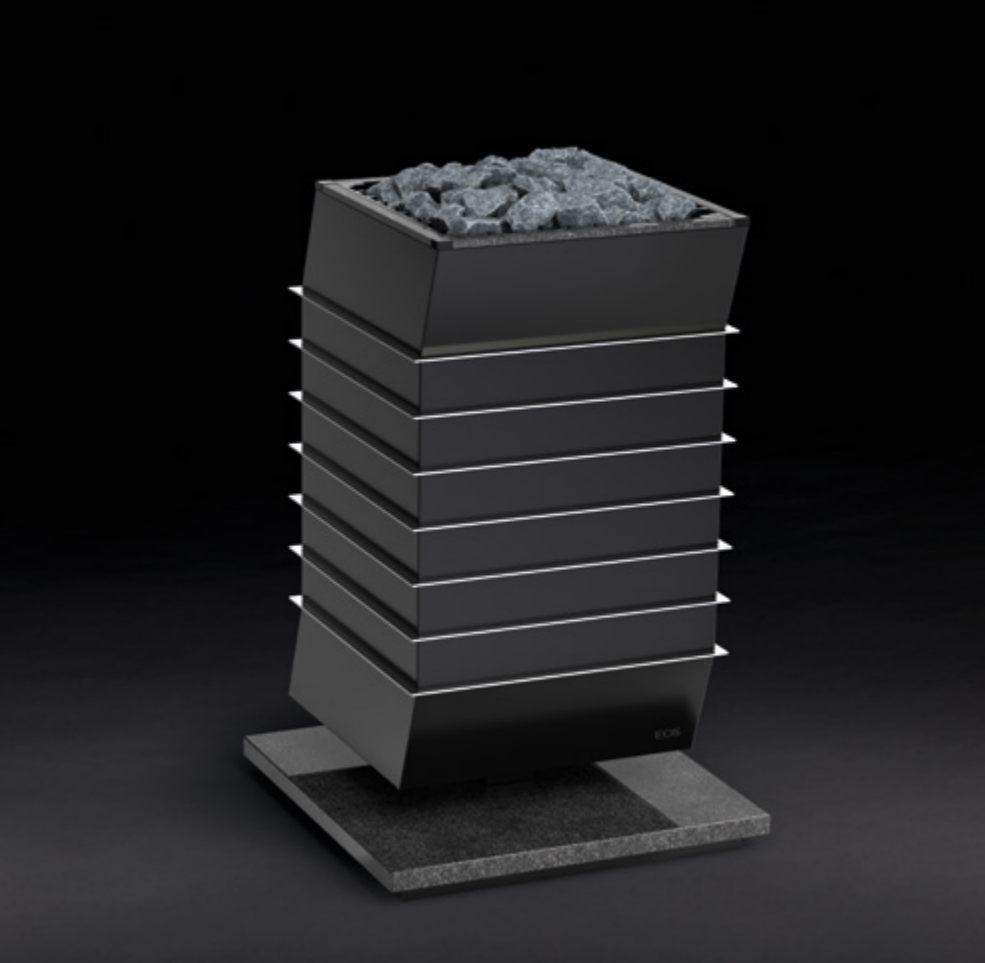

**Design heater guard rail:**  
The integrated safety guard combines protection with the heater's clear architectural language.

**Dynamic form:**  
The curved S-shaped silhouette gives the heater a strong and distinctive presence in the space.

 **FINNISH**

EOS Mythos S45 Dark Bronze

# The clear form.

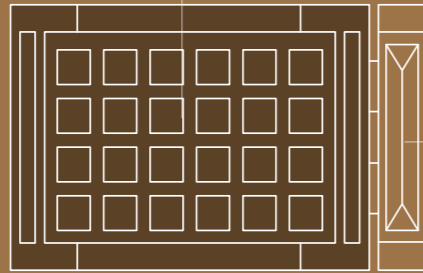

This Mythos defines the sauna ritual. Its clear, cubic form becomes an architectural statement. A perfect match are the unique Cubius stones made of olivine diabase, precisely cut into cube form. This sauna heater is more than a design object: with up to 45 kilograms of stones, it delivers powerful steam during infusion – while its compact dimensions also make it suitable for smaller saunas. And it remains flexible: optionally available with a vapor unit for Combi sauna operation in gentle humid warmth.

EOS Mythos S35 Matt black

**Impressive infusion:**

Large stone volume for intense, long-lasting steam. Available with Cubius stones (block), White, Dark Bronze and Water Reflection as standard finishes.

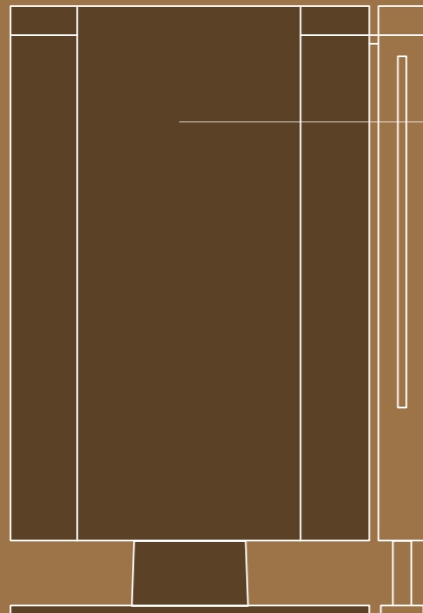

**Combi sauna option:**

Gentle humid sauna operation with optional vapor unit.

**Defined radii:**

Mythos stands for craftsmanship at the highest level. Every edge, every joint in premium quality.

**Custom finishes:**

Available in Anthracite, White or Black matt. Additional custom finishes on request.

NEW

**Material highlight:**  
"Water Reflection"

A targeted lighting accent creates reflections reminiscent of a water surface within the sauna.

The sauna heater mirrors the craftsmanship of your sauna.

# Majestic.

The EOS Majesty combines majestic design with innovative construction. The surrounding slats in polished stainless steel, combined with elegant matt black and white quartz stones, emphasise the exceptional aesthetic of this sauna heater. With its clear design language, it integrates seamlessly into modern, high-end sauna cabins. Its uniform appearance from all sides allows flexible placement – whether in front of glass surfaces or at the centre of the sauna, where it can fully express its distinctive character. Thanks to its smart proportions, it requires only minimal space.

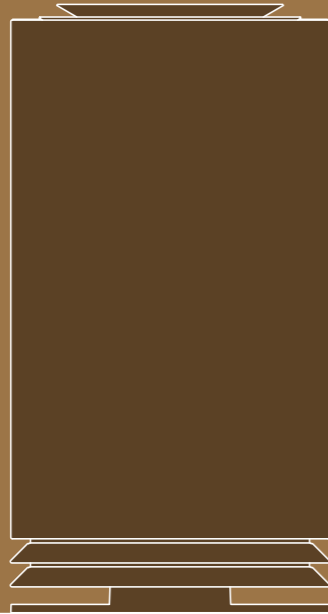

# EOS MAJESTY

**Majestic design:**  
Sculptural form with a clear design language, created as a visual focal point for high-end sauna installations.

**Polished stainless steel frame:**  
High-quality stainless steel surround combined with deep matt black for an elegant material contrast.

**Optimised heat distribution:**  
Optimised airflow ensures even heat throughout the entire sauna space.

**Quartz stones:**  
White quartz stones emphasise the refined aesthetic and create a harmonious overall appearance.

# The Filigree.

The EOS Pipe is laser-cut from a solid stainless steel tube with a wall thickness of four millimetres. The elliptical freeform cut reveals different geometries depending on the viewing angle, creating a dynamic and sculptural appearance. Its slender design ensures a minimal footprint, making it ideal for compact saunas for one or two people. The EOS Pipe is available in two variants: in the Pipe Control version, the heater is operated via two heat-resistant aluminium control knobs on the front. The non-control version is operated via a separate control unit installed outside the sauna.

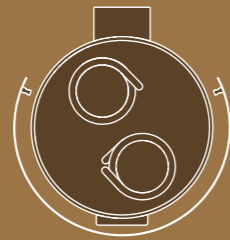

EOS Pipe Control Anthracite

EOS Pipe Anthracite

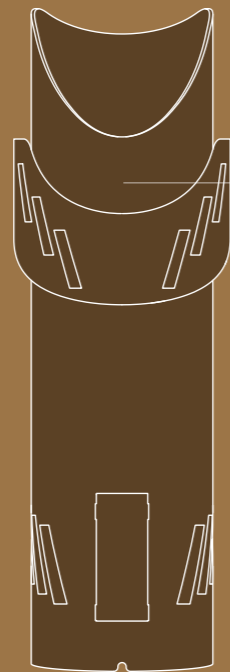

**Flexible installation:**

Wall-mounted heater that can also be installed in a corner to save space.

**Compact design:**

Compact, curved heating elements ensure efficient heat generation.

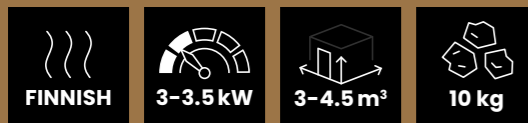

**High-quality outer shell:**

Made from 4 mm thick steel tube, precise laser-cut with an elegant linear pattern.

**Distinctive design:**

The striking form makes the heater a unique focal point in modern sauna spaces.

Rust Marble

### Sauna infusion set

- Premium infusion bucket in an extravagant cubic design, made of high-quality, hand-welded steel
- With matching design ladle featuring a wooden handle made of thermally treated wood and a specially developed spout
- The ladle can be elegantly stored directly inside the bucket

### EOS Excellent climate station

- Exclusive climate measurement station
- Round instruments set in an anthracite-effect metal plate with a frame made of fine walnut or maple
- Ø100 mm thermometer and hygrometer
- Measuring range: 0–120 °C or 0–100% relative humidity
- Dimensions: 180 × 245 mm
- Available in two design variants: walnut and maple
- Type 100D – walnut
- Type 100L – maple

### EOS Excellent sand timer

- Exclusive sauna sand timer in a stylish cubic design with contrasting sand filling
- Crafted from solid wood in high-quality workmanship
- Innovative self-righting mechanism for vertical positioning thanks to integrated magnetic holder
- Available in two design variants: walnut and maple
- Type 15D – walnut
- Type 15L – maple

### Diabase sauna stones

- Very fine-grained, durable structure
- Long-lasting, very high heat storage capacity
- Ideal for frequent infusions
- Colour: medium grey to grey-green
- Grain size: approx. 30–150 mm
- Available in various package sizes (e.g. 8, 15, 20, 25 kg)

### Dark volcanic sauna stones

- High-quality dark sauna stones made of volcanic rock
- Turn almost black during infusions and develop a glossy surface through light reflection
- Colour: dark grey with distinctive crystalline inclusions
- Grain size: approx. 50–100 mm
- Available in 20 kg or 25 kg packages.

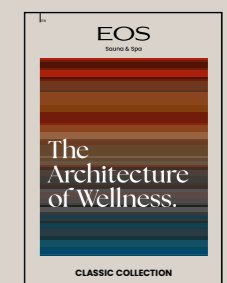

### White quartz sauna stones

- High-quality sauna stones made of quartz
- Particularly suitable as decorative top layer on the heater
- Note: fragile stones should only be used as the top layer
- Specially rounded shape with fine-pored surface for excellent infusion properties
- Colour: white
- Grain size: approx. 50–80 mm
- 10 kg

### Further accessories

- A wide range of sauna accessories can be found in our catalogue: EOS Classic collection
