EOS Vision and Future

FINEST SAUNA ENGINEERING

Passion for Spa and Wellness Engineering

Passion for spa and wellness engineering is deeply rooted at EOS and can be felt in each of our products. An EOS product arouses desire and forms the basis for a place of relaxation. EOS products convey pure elegance and luxury. They combine aesthetics, quality and functionality in equal measure.

The passion for spa and wellness engineering has always been our motivation. Since the foundation in 1944, our company has experienced a rapid and steady development. From market leader for design sauna heaters, EOS has developed into the luxury brand for spa and wellness hardware for private and commercial use with a large range of sauna heaters, infrared and steam room equipment, the corresponding control units and a wide range of accessories.

However, the focus of our activities has always been the idea to realize high-quality spa and wellness hardware with which wellness oases can be equipped to meet the highest demands.

Our recipe for success are contemporary, technically innovative products of the highest quality, with a trend-setting and, if desired, extravagant design.

EOS products are sold in over 80 countries worldwide. They are the result of intensive engineering, the use of highest quality materials and the most careful manufacturing. We focus on the combination of modern production facilities and elaborate craftsmanship.

Our products are manufactured exclusively in our manufactory in Driedorf, Germany. On site we have the opportunity to expand the know-how of our employees over the long term, thus permanently manifesting the highest level of quality. It is therefore a standard procedure that each individual product is subjected to extensive tests before delivery. Our products impress with maximum durability and contribute to a unique sense of well-being through the combination of functionality and design.

EOS Vision and Future

Unique design

Passion makes the difference

With the products from the Vision and Future sauna heater series, we are passionately setting a new milestone in modern sauna hardware design.

The strong design concept is based on a high level of individualization. All variants are inspired by a distinctive attention to detail and at the same time sculptural design language, whereby the inclined design itself represents something very special. The handcrafted polished stainless steel frames form an attractive contrast to the elegant black matt finish and emphasize the futuristic and noble character.

Powerful and gentle at the same time, the elegant natural stone base complements the perfect design. The fine shine of the natural stone, its extreme resistance and creative adaptability make this material attractive. With the optional matching stone strips at the top part, a harmonious overall appearance is created.

EOS Vision and Future stand for maximum durability.

Maximum freedom of Design

EOS Vision and Future stand for more space and diversity. The noble materials of this sauna heater series emphasize your personal style and make your sauna cabin unique.

Each of these two types of sauna heaters has a unique design concept; the EOS Future is completely inclined, whereas the EOS Vision is angled twice in its inclination. What is special about both sauna heaters is that the body appears to be floating above the elegant natural stone base.

No matter which of these two sauna heaters you choose, you have the choice between three high-class types of natural stone for the base.

You can also choose a matching counterpart for the top part to match the base, or you can opt for a modern, linear top part with a matt black finish.

Nero Impala Giallo Veneziano Silver Wave

EOS Vision Stone

EOS Future Stone

The optional gold-plated surface of the frames, the heater guard rail or even the complete sauna heater reflects the highest degree of exclusivity. This noble decorative finish in a high-gloss look makes this heater series a novelty that is unique.

With the optionally available lighting in the base, the elegant and floating appearance of the sauna heater series is additionally emphasized and effectively set. Different colour variations can be selected to suit your mood.

Premium design
does not exclude safety

EOS Vision and Future also impress in terms of safety.

The optionally available heater guard rail made of polished stainless steel is absolutely extraordinary. Separate guard rail brackets are available for an individual safety guard rail.

The EOSafe L safety system, which is discreetly designed in black, provides additional safety and can be easily attached to the top of the rock store frame.
