

EOS Majesty

Majestic design for highest demands

The new EOS Majesty combines majestic design with innovative construction. The surrounding **slats made of polished stainless steel** in combination with **elegant matt black** and white quartz stones emphasize the extraordinary aesthetics of this sauna heater.

With its **uniform appearance on all sides**, it fits perfectly into high-quality sauna cabins and can be placed freely in front of glass panels or in the center of the sauna. The solid base enables invisible cable routing. Furthermore, it is also very space-saving with a depth of only 37 cm.

The arrangement of the heating elements underneath the specially designed rock store ensures a **long service life** for the heating elements. As a result, the heating elements do not come into direct contact with the sauna stones and are not exposed to any mechanical loads.

The slanted slats above the rock store not only give the sauna heater its unique design, but also direct the air in a targeted manner and thus ensure **optimal heat distribution in the sauna cabin**.

Technical specifications

Power: 6,0 | 8,0 | 10,0 kW
 Connection: 400 V 3N ~ 50 Hz
 Dimensions: HxWxD: 80 x 42 x 37 cm

8 years
