EOS App module NA

Comfortable remote sauna control from your mobile device

With the EOS Spa Control App, sauna cabins can be conveniently from your smartphone or a tablet PC through the EOS App module while on the move.

A quick check of the current temperature or remaining heating time is easily possible.

The App features different preset profiles, which can be customized with just a few clicks.

The **EOS Spa Control App** will automatically detect the paired sauna control unit and adjust its interface for a simple and intuitive operation. Works on dynamic IP basis. Status LED for connection and network activity. Automatic firmware updates.

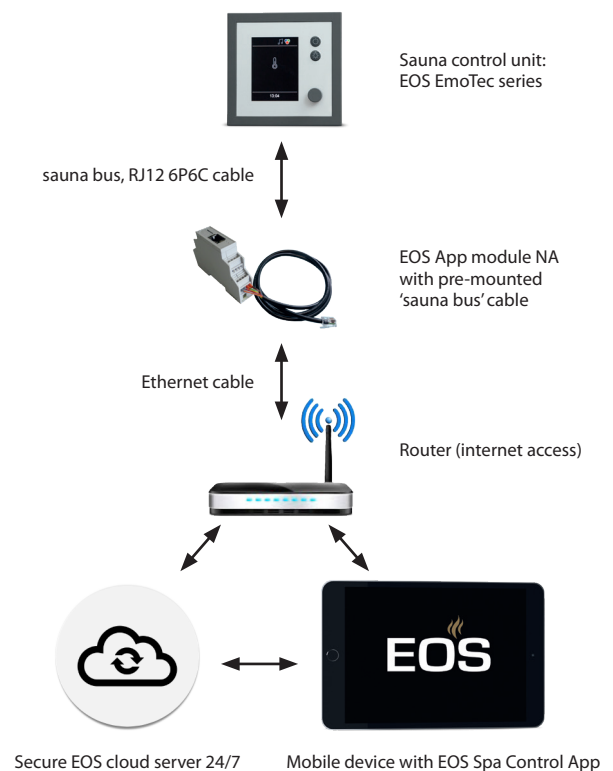

Features and benefits:

- ✓ Sauna control from any location worldwide thanks to the operation on dynamic IP address basis (requires internet access).
- ✓ EOS Spa Control App with simple self-explaining setup and intuitive operation.
- ✓ Simple and fast installation thanks to the compact cap rail housing with pre-mounted sauna bus cable for connection to the sauna control unit (plug & play).
- ✓ Simple and intuitive operation.
- ✓ Very high protection by communication and data storage.
- ✓ Automatic firmware updates.
- ✓ No additional power supply.
- ✓ For Android and Apple iOS mobile devices.
- ✓ UL certified.
- ✓ Item no. 94 9081

Delivery does not include a smartphone or a tablet
